APIR Code ETL3065AU As of 31/03/2022

### **Fund Overview**

The Colchester Emerging Markets Bond Fund seeks to deliver to investors higher medium-term growth and income (relative to developed markets) from a diversified portfolio of sovereign bonds and currencies in emerging markets. We believe that if we hold a portfolio of high real yielding bonds and currencies that are undervalued according to their real exchange rate that over time this will prove rewarding. At the heart of Colchester's value-oriented philosophy is the belief that investments should be valued in terms of the income they will generate in real terms. Our approach is based on the analysis of inflation, real interest rates and real exchange rates supplemented by an assessment of sovereign financial balances. Portfolios are constructed to benefit from those opportunities with the greatest relative investment potential for a given level of risk.

Malaysian Ringgit	14.63%		4.77%	
Czech Koruna	0.05%		-4.69%	

## Commentary

The fund returned -5.24% over the month, underperforming the benchmark which returned -4.85%. Bond selection added 0.02% to relative returns, while currency selection detracted -0.41%. The top three positive bond contributors to relative returns were the underweight positions in Poland, Czech Republic and Thailand. The top three currency detractors from relative returns were the overweight positions in Korean Won and Malaysia Ringgit and the underweight position in Russian Ruble.

The Russian invasion of Ukraine and associated inflation risks dominated investors' deliberations in the first quarter of this year. Bond yields moved higher, generating negative returns across all fixed income sectors. The JP Morgan GBI-EM Global Diversified Index returned -8.1% in USD hedged terms over the quarter, with the collapse in Russian bond prices being the largest contributor. In unhedged USD terms, returns were slightly better at -6.5% as EM currencies largely performed well.

In Latin America, returns from government bond markets were mostly negative. Brazil was amongst the relative outperformers in the region however as its government bond market returned 0.9% over the quarter. Whilst inflation has continued to rise, hitting 10.5% in February, the Central Bank maintained its hiking cycle lifting the Selic rate by 2.5% over the quarter to 11.75%. Colombia was the worst performer in the region, with government bonds falling -5.5%. Although inflation has risen over the quarter from 5.6% to 8.5% as at the end of March, and the Central Bank has hiked rates by 200 basis points to 5.0%, markets have become increasingly concerned about the outcome of the upcoming Presidential election in May. The favorite to win, Gustavo Petro, is a leftist populist candidate, who is proposing to shift the country away from its current orthodox economic framework and halt new oil exploration. However, Colombia's congress will remain split, preventing the passage of unorthodox proposals, and the right-wing candidate Gutierrez is closing the gap with regards to voter intent. In Mexico, as in the rest of the region, inflation ended the quarter higher at 7.5%, with the bond market returning -1.6%. In the rest of the region, Chile and Peru were down -1.7% and -2.9% respectively.

The Russian invasion of Ukraine, launched on 24th February, continues to reverberate across financial markets. The West has been quick to impose several rounds of sanctions against Russia since the conflict began, including across the financial sector. Russia in turn has imposed its own 'counter-sanctions', including a prohibition on Russian financial institutions transferring Russian rubles abroad. This has effectively created a two-tier market for local currency Russian debt, with the market for non-residents severely constrained. Russian debt has now been removed from the JP Morgan GBI-EM Global Diversified index as of the end of March. Turning to South Africa, the bond market returned a healthy 1.9% for the quarter. The Central Bank raised rates twice by 25bps to 4.25% currently whilst inflation remains within the target range of 3-6% at 5.7%. Elsewhere, bond markets in central Europe performed poorly with the Hungarian market down -7.4% and Polish bonds down -5.1%.

Chinese government bonds showed a positive return of 0.6% this quarter. Inflation in China is on a different path to much of the world as it fell back to below 1%. Policymakers in the country have vowed to implement various measures to stimulate growth as the country continues to battle with Covid-19. Malaysian bonds returned -0.8% as the Central Bank chose to leave interest rates unchanged at 1.75%. In Indonesia, the Central Bank also kept its policy rate unchanged at 3.5% and the local bond market was close to flat, returning -0.2%.

Despite the Russian invasion of Ukraine, emerging market currencies were generally stronger over the first quarter of 2022. The three best performing currencies were the Brazilian real, South African rand and Colombian peso returning 17.2%, 9.2% and 8.4% respectively. All three currencies benefitted from higher commodity prices, as did the Chilean peso rising 8.3% over the quarter. The Egyptian pound was the worst performer, falling -14.1% over the quarter, as the Central Bank devalued the currency. The Turkish lira sold off also, weakening by -9.5% as the country showed its largest quarterly trade deficit since 2013.

### Important Information and Disclosures

This document is prepared by Colchester Global Investors (Singapore) Pte. Ltd (ABN 58 159 947 583). Equity Trustees Limited (ABN 46 004 031 298, AFSL 240975), a subsidiary of EQT Holdings Limited, a publicly listed company on the Australian Securities Exchange (ASX: EQT), is the Responsible Entity of the Colchester Global Government Bond Fund (ARSN 168 909 671) and the Colchester Emerging Markets Bond Fund (ARSN 616 633 428) (each a "fund"). This document is not intended to be securities or financial product advice and should not be relied upon as such. To obtain a copy of a Fund's PDS please contact Colchester. The PDS should be considered in deciding whether to acquire, or continue to hold, an investment in a Fund. This information is of a general nature only and does not take into account the investment objectives, financial situation or particular needs of any investor and should not be taken as a securities or stock recommendation. These factors should be considered before any investment decision is made in relation to a Fund. The performance of a Fund is not guaranteed. Colchester, Equity Trustees Limited and their related parties, their employees and directors make no representation (express or implied) and shall have no liability in any way arising from the provision of this document for any loss or damage, direct or indirect, arising from the use of this document.

Net of fee returns reflect the deduction of fees and expenses and are calculated on the basis of the applicable fee rates as described in the PDS. Additional information regarding policies and procedures for calculating and reporting returns is also available on request. Where any part of the total cost of your investment is paid in, or represents an amount of, a currency other than the Share Class currency, these costs may increase or diminish as a result of currency and exchange rate fluctuations.

Where an investor's own currency is different from the Fund currency, the return on investments could be affected by fluctuations in the exchange rate.

The Fund can invest in bonds (which may include inflation linked bonds) issued by governments, government agencies and supra-national agencies (such as the World Bank), irrespective of whether such bonds are included in the benchmark. The Fund will tend to purchase bonds with characteristics similar to those in the benchmark however, the investment strategy can lead to significant deviation from the benchmark in terms of country and currency weightings and duration, which can cause the return of the Fund to differ significantly from that of the benchmark. The Fund can invest in currencies using contracts on the spot and forward market, such as forward currency contracts to buy or sell a currency at a specified future time at an agreed price)

Valuation and returns have been calculated in AUD as at month end. The WM-Reuters exchange rate used by the index provider in compiling their index is the predominant exchange rate used in valuing the Fund. The benchmark is the JP Morgan Government Bond Index Emerging Markets Global Diversified 100% Unhedged in Australian Dollars (AUD Unhedged). Rating agencies assign credit ratings to sovereign securities as an assessment of the commitment from central governments to repay their outstanding debt obligations. For the purposes of this factsheet, the rating of a sovereign security is determined by reference to the rating of the issuer of that sovereign security as determined by the relevant rating agency. This will also apply to securities the issuer of which is backed by a central government. For all other securities, its rating is determined by reference to the rating granted to that security as determined by the relevant rating agency, or if unrated by all of them, by an equivalent rating determined by the Manager at its sole discretion. All securities are rated by Nationally Recognized Statistical Rating Organizations (NRSRO) Moody's, Standard & Poor's (S&P), and/or Fitch. If a security is rated by more than one of these organisations, the highest rating assigned is used in our credit rating breakdowns. Ratings are measured on a scale that generally ranges from AAA (being the highest) to D (being the lowest).

Colchester Global Investors (Singapore) Pte. Ltd is registered in Singapore, Company Registration No: 201202440M. Registered Office: 6 Battery Road #40-02A, Six Battery Road, Singapore 049909. Colchester Global Investors (Singapore) Pte. Ltd holds a capital markets services licence in fund management issued by the Monetary Authority of Singapore pursuant to the Securities and Futures Act 2001. Colchester Global Investors (Singapore) Pte. Ltd is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 (Cwlth) in respect of financial services provided to wholesale clients in Australia. Colchester Global Investors (Singapore) Pte. Ltd. is regulated by the Monetary Authority of Singapore under Singaporean laws which differ from Australian laws. Therefore, Australian wholesale clients are not necessarily subject to the same types of legal protections or remedies that they would enjoy if Colchester was directly subject to the Corporations Act. Colchester is entitled to offer its financial services in Australian pursuant to an exemption from the requirement to hold an Australian Financial Services Licence under the Corporations Act, on the basis, among other things, that the clients are Wholesale Clients within the meaning of the Corporations Act.

The rating issued September 2021 Colchester Global Government Bond Fund and Colchester Emerging Markets Bond Fund are published by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445 (Lonsec). The Zenith Investment Partners (ABN 27 103 132 672, AFS Licence 226872) ("Zenith") rating (assigned March 2022 for Colchester Global Government Bond Fund and Colchester Emerging Markets Bond Fund) referred to in this piece is limited to "General Advice" (s766B Corporations Act 2001) for Wholesale clients only. This advice has been prepared without taking into account the objectives, financial situation or needs of any individual, including target markets of financial products, where applicable, and is subject to change at any time without prior notice. It is not a specific recommendation to purchase, sell or hold the relevant product(s). Investors should seek independent financial advice before making an investment decision and should consider the appropriateness of this advice in light of their own objectives, financial situation and needs. Investors should obtain a copy of, and consider, the PDS or offer document before making any decision and refer to the full Zenith Product Assessment available on the Zenith website. Past performance is not an indication of future performance. Zenith usually charges the product issuer, fund manager or related party to conduct Product Assessments. Full details regarding Zenith's methodology, ratings definitions and regulatory compliance are available on our Product Assessments and at Fund Research Regulatory Guidelines.

The Zenith Fund Awards were issued 30 October 2020 by Zenith Investment Partners (ABN 27 130 132 672, AFSL 226872) and are determined using proprietary methodologies. The Fund Awards are solely statements of opinion and do not represent recommendations to purchase, hold or sell any securities or make any other investment decisions. To the extent that the Fund Awards constitutes advice, it is General Advice for Wholesale clients only without taking into consideration the objectives, financial situation or needs of any specific person. Investors should seek their own independent financial advice before making any investment decisions and should consider the appropriateness of any advice. Investors should obtain a copy of and consider any relevant PDS or offer document before making any investment decisions. Past performance is not an indication of future performance. Fund Awards are current for 12 months from the date awarded and are subject to change at any time. Fund Awards for previous years are referenced for historical purposes only. Colchester was nominated as a Finalist in the Global and Diversified Fixed Interest category at the Zenith Fund Awards in October 2020.

The Colchester Global Government Bond Fund and Colchester Emerging Markets Bond Fund's Target Market Determination is available at https://colchesterglobal.com.au/invest-with-colchester-global/. A Target Market Determination is a document which is required to be made available from 5 October 2021. It describes who this financial product is likely to be appropriate for (i.e. the target market), and any conditions around how the product can be distributed to investors. It also describes the events or circumstances where the Target Market Determination for this financial product may need to be reviewed.
